JOHN T. HOFFMAN.

SHEFFIELD SCIENTIFIC SCHOOL.

ENGINEERING DEPARTMENT,
YALE COLLEGE, November 6, 1866.

I have always recommended the Faber polygrade lead pencils as the only pencils fitted for both ornamental and mathematical drawing; but after a thorough trial of the AMERICAN POLYGRADE LEAD PENCILS manufactured by the American Lead Pencil Co. N. Y. I find them superior to any pencil in use, even to the Faber or the old English Cumberland lead pencil, being a superior pencil for sketching, ornamental and mechanical drawing, and all the ordinary uses of a lead pencil.

These pencils are very finely graded and have a very smooth lead: even the softest pencils hold the point well, they are all that can be desired in a pencil. It gives me great pleasure to be able to assure Americans, that they will no longer be compelled to depend upon Germany or any other foreign market for pencils.

LOUIS BAIL,

Professor of Drawing, &c.

CROSS KEY'S POST OFFICE,

ROCKINGHAM CO. VIRGINIA, January 8, 1867.

To the American Lead Pencil Co.

Dear Sir:—Your favor has been duly received enclosing one half Dozen of assorted Pencils. I have given the Pencils a fair trial in comparison with "Faber's" and other celebrated Manufacturers, and I am free to say that I consider the pencils of the American Lead Pencil Company N. Y., superior to any I have ever used in my profession. I shall hereafter introduce them exclusively in my office. You will please accept my thanks for the liberality you have shown me in sending me three times the number of Pencils I sent money for. Hoping your enterprise will meet with great success, allow me to subscribe myself.

Yours most respectfully

EDWARD S. KEMPER,

Civil Engineer and Surveyor.

NEW HAVEN, January 11, 1867.

PROFESSOR BAIL, YALE COLLEGE.

Dear Sir:—I thank you for having called my attention to the pencils of the American Lead Pencil Co., N. Y. They are indeed excellent and upon comparison with those of Faber, which thus far I have used in my topographical labors exclusively, I find that they are really and substantially better.

These American Lead Pencils surpass the celebrated Faber's in fineness of grain, evenness and in the capacity to hold a sharp point. They cannot fail to be preferred by all our artists as soon as they are generally known, and the moderate price, for which they are sold, must secure to them in course of time the entire American market.

Very truly yours,

A. VON STEINWEHR,

late Brig. Gen. U. S. A.

SPEAKER'S ROOM, HOUSE OF REPRESENTATIVES,
COMMONWEALTH OF PENNSYLVANIA.

HARRISBURG, Sept. 12, 1866.

American Lead Pencil Co., New York.

Gentlemen:—Some time ago your agent left with me samples of pencils made by you, which I have used and distributed to others. I am much gratified to be able to say that your manufacture is the best I have used, and that Americans need no longer be under obligations to the Foreign Manufacturers for a first class pencil for any use.

Respectfully yours

JNO. A. SMALL,

Resident Clerk H. R.

COMMONWEALTH OF MASSACHUSETTS,
